

PERMANENT ENTRY NUMBERS

For some time it has been felt that the Commercial and Collector exhibitors who travel long distances to enter large numbers of bloom in the shows should have a permanent entry number. They could have their tags all made before arriving at the show. This would speed up the work of getting bloom entered at the various shows.

A committee was appointed and their recommendations were adopted at the Annual Meeting recently. It will take the cooperation of all chapters in order to make this work. Since the entry number is folded inside the tag the judges can not see whose bloom they are judging. A permanent number can be obtained by asking the Executive Secretary.

Collector numbers start at 399 and work down. At present 22 collectors have permanent numbers. Those who grow more than 25 varieties of Hibiscus are Collectors. They can grow as many plants of each variety as they wish but the total number of varieties must be more than 25 before they are considered Collectors. Amateurs are those who grow 25 or less varieties.

The Commercial numbers start at 599 and work down.
